Hi Amy,
One more question: is there parking in the area?
See you later
Ana

>>> Hi Ana and D'Ann,

>>> I was wondering if we could schedule a time for one of your students to show us how to use the meter? We would probably take a few readings as soon as we can and take a few more after your class in March. We would not need to keep it but would love an hour of someones time to help us take some readings. We are doing an experiment with the 5th graders on whether or not having plants in the classroom helps with the indoor air quality. So we would just like to take measurements in several classrooms.
